COVER LETTER

My desire to develop in the IT sphere made me apply for the competition. I strongly believe that I will gain work experience, which will be beneficial for me in the near future. Due to my teamwork skills that I practiced during my internship, as soon as I join to the work sphere I will be productive through my contest. Also that experience helped me gain first-hand Organization and Problem-solving abilities.

The only thing that I know is that I will climb the stairs of IT industry and I want to continue as a IT specialist in the following years.

I already have started my career as an Junior Support and Testing Engineer and my goal is to reach the top of the industry step by step. I like to deal with difficult and challenging tasks, that bother me, but at the end I handle with them and with a pleasure I response to the customer that the requested change is done.

Being a part of another branch is unimaginable for me because in the IT branch we develop every day and we are learning new things.

Thank you for your time and consideration. I look forward to meeting you soon and I'm happy to answer any questions you have.

Best Regards,
Burdzhu Bahri,
